

Track your patient sign-ups

See the Business Insights tab in your PlusOne console to track progress.

Based on a survey, 85% of patients want somewhere to store escripts; and 1 in 2 don't know what medications they are on and how many repeats are left.

Empower Patients with the App

- **Store Escripts:** Patients can securely save their electronic prescriptions.
- **Refill Reminders:** Get timely alerts to refill prescriptions.
- **Medication Management:** Access all medications in one location.
- **Order and Pay:** Scripts are prepared for collection or delivery

Boost Customer Sign-ups

- **Approach:** Engage every customer and talk about the App. Keep it simple.
- **Sign:** Be ready with the activation code or send an SMS link to download the App.
- **Easy Sign-Up:** Assure patients of quick Apple/Google/Microsoft registrations and medication visibility within 24 hours.

Monitor Business Insights and Training

- **Track Progress:** Use PlusOne's Business insights to measure success and record on the chart above.
- **Staff Training:** Access Medadvisor training resources for all team members.
- **App Familiarity:** Have all staff download the App and explore its features

●● I can't find my eScript in my messages

85%

of pharmacy staff surveyed point to patients struggling to locate their eScripts.

●● My patients are too old! (App patient demographics)
